

# FONTANA D2MOS

# **Special Grease with MOS2**

# **Description:**

**FONTANA D2MOS** is a dark grey lithium saponified, temperature and water resistant multi-purpose grease of NLGI category 2. To increase the pressure susceptibility of lubrication and for boundary behaviour it contains a very effective additive combination as well as molybdändisulfide (MOS2) as tight lubrication. Well selected substances providing good corrosion protection and high ageing stability.

**FONTANA D2MOS** is an application as lubrication grease, as engine grease, sliding and rolling bearing grease at all normal and raised temperatures and conditions at vehicles, normal and raised temperatures and loads of vehicles, equipment and machinery, for conveyor systems, construction machinery etc.

Effects

Efficient

Excellent lubrication properties

Also applicable in presence of sea water

With boundary properties

High operating reliability

Extreme long lubricity

### Properties

- Good adhesion ability
- Higher pressure susception
- Oxidation stability
- High ageing stability
- Excellent corrosion protection
- Cold and hot water resistant
- Especially stable to milling
- Temperature stability

# Technical dataTypical characteristics:Temperature application range-30°C up to +120°C /<br/>max. +130°CDrop point180°CNLGI-category2Term (DIN 51502):KPF2K-30ISO 12924:L-XC(F)CHB2

# **Examples of use:**

In general for severe conditions. For installation, maintenance and for repair of vehicles, construction-, algricultural- and printing machinery.

Universal grease for lifts, elevators, construction machinery, construction cranes, crusher, mixing drums, rams, rotary-tower cornices, excavators, ball turner, battery charger, stub axle bolts, wheel sets, conveyor belts, water pumps, for the industry as well as for agriculture and forestry.
