

Driver Antifreeze windscreen washer -60°C

Concentrate with lemon fragrance (free of methanol)

Description:

Driver Antifreeze windscreen washer -60°C windscreen cleansing additive is a concentrate based on alcohols with antifreeze and cleaning agents. It will prevent freezing of windscreen and headlight washers. This will be achieved by lowering of the freezing point of washer fluids depending on the quantity of the additive. Dirt of road traffic will be removed easily under all weather conditions and thus ensure clear sight constantly. Paints and rubbers will not be attacked.

Driver Antifreeze windscreen washer -60°C concentrate is suitable for all customary kinds of glass and polycarbonate panes. Suitable for washer nozzles up to a mixing ratio of -15°C outdoor temperature.

Application: Winter month:

Mixing ratio		
Ratio antifreeze	Ratio water	Antifreeze protection up to
100 %	-	-60°C
50%	50%	-20°C
33%	66%	-14°C

Application: Summer month:

Driver Antifreeze windscreen washer -60°C concentrate is also applicable in summer. Here ratio to 5 - 10 ratios of water is sufficient to achieve a net effect and cordy-free cleaning of the windscreen.
