

Antifreeze windscreen washer -20°C

Ready for use with citrus scent (methanol-free)

Description:

Antifreeze windscreen washer -20°C is an alcohol-based windscreen washer additive with antifreeze and cleaning components. Freezing of the windscreen and headlight washing systems is prevented.

Causes a lowering of the freezing point of the washer fluid depending on the amount of additive.

Effortlessly removes dirt in street traffic during all weather conditions and always provides a clear view. Paint and rubber are not damaged.

Antifreeze windscreen washer -20°C is ready for use immediately and is suitable for standard types of glass as well as polycarbonate windscreens. Fan-type nozzle suitable up to a mixing ratio of -15°C outside temperature.

Application: Winter month:

Mixing ratio		
Ratio antifreeze	Ratio water	Antifreeze protection up to
100%	-	-20°C

Application: Summer month:

Antifreeze windscreen washer -20°C can also be used in the summer. Here one part to approx. 2 parts water is sufficient for impacting the line and achieving streak-free cleaning of the front windscreen.
